

identified application as follows.

In the Claims:

76. (twice amended) A first therapeutic agent in accordance with claim 69 in which each of the indoxyl compounds [are] is selected from the group consisting of indoxyl-lactam, indoxyl-glycosides, and the like which when attached to position 3 of the indoxyl compounds are cleavable by the first enzyme moiety of the first bispecific reagent, the material remaining after cleaving at position 3 being a soluble reactive intermediate molecule which is adapted to be oxidized and dimerized, thereby forming the first extra-cellular precipitate.

REMARKS

This Amendment is in supplement to the Amendment filed on September 29, 1997 in response to the first Office Action, mailed May 23, 1997 and in response to the Office communication, mailed November 27, 1997.

Claim 76 has been amended to correct typographical errors.

In the prior Amendment in response to the requirement of restriction to one of the inventions identified as Groups I-XV on pages 2 and 3 of the first Action, the Applicant provisionally elected the invention of Group XIV which the first Action indicated includes claims 69-83 drawn to a composition of a therapeutic agent and a bispecific reagent classified in Class 530, Sub-class 402.
